BTS

HOW THE FRENS WERE CREATED?

Once upon a time, Jenni's community of office workers called OpenFren. One day, The Heroes decided to create NFTs for OpenFren Twitch fam and they were joined by one one man who, using existing character types with shapes for each occupation.

With the help of our talented artists, we began our NFT journey. We began by drafting characters and based on their occupations, we created a character design study, project characters onto the characters while being distinct from each other likeness different roles.

After we finalised on the character's traits, we went deep into designing characters using shapes and identifiers. We created a character design study, project characters onto some characters based on occupational traits related

22

Remember our previous post? We showed you the three styles we picked? We ran had a quick experiment with the rendering engine on our monster character but was not the difference in the line color saturation, and shading. We decided to go with the original design, which we felt was more in line with the original brand.

After testing on our target every accessories, we had found the right proportion.

We decided on a combination of the 3 styles, and we finally created a perfect monster accessories from the NFT dataset.

And there you have it, the artistic journey that got us to where we are now
and our Founding Fren characters.
